

Organizations such as FireSmart Canada recommend maintaining a defensible space in proximity to buildings. (See FireSmart Canada to find helpful information).

Protecting Homes & Preserving Communities

## FPS REFLECT™ – A protective cover for structures, assets & valuables

### WHY FPS REFLECT™?

In many situations a wildfire safe defensible perimeter cannot be established. FPS REFLECT™ significantly reduces the risk of close proximity wildfires causing damage to adjacent structures, assets or valuables.

### WHAT IS IT MADE OF?

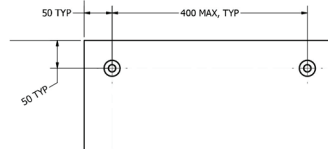

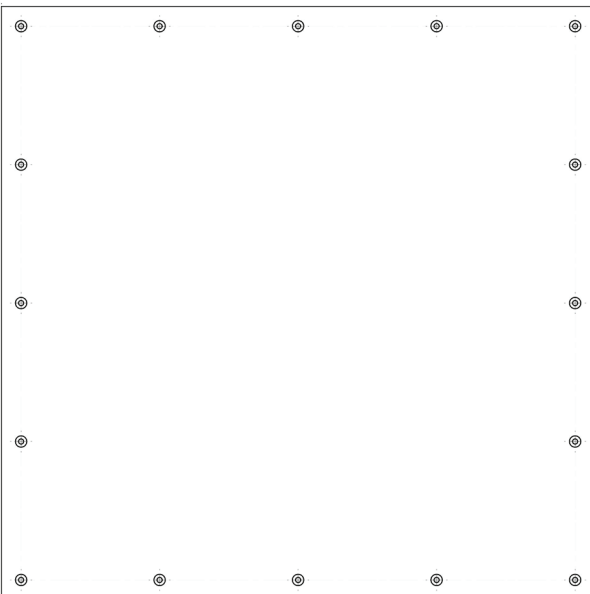

FPS REFLECT™ is an extremely fire-resistant textile, aluminized for reflective properties. This material technology has been specifically manufactured for use in extreme heat environments, fire safety, and for personal protective equipment.

### WHAT CAN FPS REFLECT™ DO?

Our products are manufactured using materials and processes that are industry proven to protect. FPS Reflect™ prevents ignition of combustibles from wildfire embers travelling downwind. The aluminized surface REFLECTS heat from nearby fire.

### WHERE CAN I USE IT?

FPS REFLECT™ can be used for protecting small utility stations, industrial facilities, houses, outbuildings, cabins, trucks, boats, motor homes and critical infrastructure susceptible to damage or loss from fire, smoke, ash in areas at risk.

SIZES	PRICING* (CAD)
1.5m x 1.5m (5' x 5')	\$87.50
3m x 3m (10' x 10')	\$335.75
6m x 6m (20' x 20')	\$1,250.00
10m x 10m (33' x 33')	\$3,650.00

Custom designs upon request.
